Aqib Walayat

Software Developer | Tech-Driven Business Developer | I Build AI-Powered Automation, CRMs & Custom Software That Save SMEs Time & Money | Python · Full-Stack · AI Integration
Islamabad, Islāmābād, Pakistan

Summary

I am a Software & Business Developer with hands-on expertise in Software Development (Full-Stack), Digital Marketing, and AI & Automation. I combine strong technical skills with a business-growth mindset to build efficient software solutions and help companies scale smarter and faster. Currently working as a Software & Business Development Associate, I manage end-to-end software deployment, client onboarding, training, and post-implementation support while also developing and maintaining custom software tools that solve real business problems. I use Full-Stack technologies (Python, ASP.NET etc), SQL, and AI tools to build and optimize solutions that drive marketing performance, operational efficiency, and smarter decision-making. With a BS in Information Technology and hands-on experience spanning software development, business support, digital marketing, and AI, my long-term goal is to become a Tech-Driven Business Consultant helping SMEs unlock growth through technology, automation, and strategic execution. Islamabad, Pakistan Open to roles, freelance projects, and consulting opportunities
